EXPERIENCES

Programmer

Ministry of Children, Community and Social Services

May 2021 - Aug 2022

Toronto, ON

- Engaged directly with clients to digitize and automate the business processes, for the diversity panel, using **Power Automate**, **MS Forms** and **SharePoint**
- Developed a customized SharePoint site with **SharePoint Framework (SPFx)**, and **ReactJS** working on pagination and meeting accessibility standards
- Modernized team tracking for client requests using **Power Automate**, **MS Forms** and **SharePoint** to substantially reduce time to assign and input information into internal ticket system

Dairy Clerk

Longo's Corporation

July 2016 - April 2021

Milton, ON

- Demonstrated cooperativeness and teamwork abilities through effective communication in stocking store items; trusted as a designated solo department closer
- Developed strong patience and interpersonal skills through daily customer interactions, assisting with customer inquiries and building rapport with them
- Mentored and taught 5 new hires department work skills and rules, by working closely alongside them and encouraging collaboration with department members

PROJECTS

Book Review Website

<https://bookreviews-app.fly.dev/>

- Handled login, logout and session interactions with a **relational (SQL) database** using **Python (Flask)**
- Utilized Openlibrary API to obtain book information that users could search, comment and rate on
- Stores all comments and ratings by users in database - displays all user comments and ratings on account page
- Inserted smaller dataset of book information into **postgresSQL** database to search books on
